

UV-Aire Portable

Takes only one square foot of floorspace.

At last. An air purifier that actually purifies the air.

Introducing UV-Aire®. The new UV-500C attacks and reduces airborne mold, bacteria, viruses and fungi with ultraviolet light. It reduces odors and VOCs with carbon filtration. Plus, it removes dust, dander and pollen with a high efficiency filter. The result...fresher, cleaner, purer air. At last.
